

1. Analyse the population distribution map on page 44 by answering the following questions:

| Population Distribution in Canada | |
|---|-----------------|
| Question | Response |
| Where is Canada most thinly populated? | |
| Which area is most densely populated? | |
| Name two other highly populated areas. How do these highly populated areas relate to the location of Canada's main urban centres? | |
| How accurate is it to say that Canada's population is mainly concentrated in islands along the Canada-US border? Explain | |
| Why do you think the previous question is true? | |

2. Calculate the population density for the following provinces:

| Province | Population | Area |
|-----------------------|------------------|---------------------------|
| Alberta | 3,742,800 | 661,190 km ² |
| British Columbia | 4,405,000 (2008) | 950,000 km ² |
| New Brunswick | 729,997 (2006) | 73,440 km ² |
| Northwest Territories | 43,439 (2009) | 1,171,918 km ² |
| Ontario | 13,373,000 | 667,878 km ² |

3. Use the concept of situation to account for the growth (or lack of growth) in a community that you know.
